Not enough history yet

Pebbi compares Taylor with their own recent pattern, so it needs a little more history before it can spot changes.

← Reminders & Alarms

Notifications are disabled

Notification permissions are required to set reminders and receive alerts about your baby's needs.

You can enable these permissions in your phone's settings. Once enabled, you'll be able to create helpful reminders to keep track of feeding times, sleep schedules, and other important activities.

Long-term check-ins

Your first monthly check-in is included. Premium unlocks future monthly, three-, six- and twelve-month check-ins and their PDF keepsakes.

Invite more than 2 carers

Free households support you and one other carer. Upgrade to add grandparents, nannies, or anyone else who helps with care.

Track multiple babies

Expecting or already caring for more than one child? Premium lets you add additional baby profiles to your household.

Symptom photos

Add photos to symptom events so care details are clearer at a glance and sync them across devices.
