

01 Pillow

Neybox Digital | iOS app analysis | 3 October 2026

Based on the eight supplied screenshot PDFs. Prices are shown in INR as captured. Free trials are separate from ongoing free access; visible features and demo results do not alone establish free entitlement.

1. Onboarding

Starts with a welcome screen and privacy consent. Collects birth year, sex, weight, height, and usual bedtime.

Introduces notifications, other wearables, motion access, Apple Health, sleep sound recording, and optional iCloud upload. Ends with a safety explanation and “Let’s begin.”

The flow focuses on explaining permissions before requesting them.

2. When is it asking for money? Paywall

Immediately after completing onboarding, before the main app dashboard. “Start Free Trial” opens Apple’s subscription confirmation.

The screenshots do not demonstrate successfully bypassing this paywall.

3. Offer on the paywall

7-day free trial, then ₹1,999/year, presented as ₹166.58/month. Full premium access during the trial.

Trial reminder on day five and “No payment today” messaging. Restore purchase and redeem-code options.

4. What is available for free on the app?

Onboarding and initial setup are accessible. The paywall explicitly says users can continue using a limited version after the trial.

The recording does not show that limited version, so its exact free features cannot be established.

02 RISE

Rise Science | iOS app analysis | 3 October 2026

1. Onboarding

Opens with sleep benefits and RISE's personalised approach. Asks for name, discovery source, gender, age, student status, goals, lifestyle challenges, existing trackers, sleep practices, and energy habits.

Requests motion, Apple Health, and tracking permissions. Collects weekday and weekend sleep schedules.

Shows personalised sleep need, sleep debt, energy peaks and dips, and a suggested sleep window before presenting the subscription.

2. When is it asking for money? Paywall

After the extensive questionnaire and personalised results, when the user proceeds to "Try RISE."

The recording ends in the subscription flow; ongoing dashboard access without subscribing is not demonstrated.

3. Offer on the paywall

7 days free, then ₹6,900/year, presented as ₹575/month.

An alternative ₹99 for one month trial option is displayed; this is not established as the regular monthly subscription price.

Trial reminder toggle and cancellation messaging. A satisfaction-guarantee screen promises a refund within 30 days under its stated conditions.

4. What is available for free on the app?

The onboarding assessment and initial personalised previews: sleep need, sleep debt, energy schedule, and suggested sleep timing.

Ongoing tracking, coaching, and updated insights without a subscription are not demonstrated.

03 ShutEye

Enerjoy | iOS app analysis | 3 October 2026

1. Onboarding

Starts with a notification prompt, welcome screens, ratings, and user-count claims.

Asks about sleep duration, satisfaction, time to fall asleep, snoring, night waking, morning tiredness, sleeping position, habits, daily impact, and diagnosed conditions. Uses progress indicators, report-generation animation, and feature previews.

After the subscription attempt is cancelled, continues with sleep-score education and wake-up-time setup before reaching the dashboard.

2. When is it asking for money? Paywall

After the initial questionnaire and feature previews, before the dashboard.

Cancelling Apple's purchase sheet produces a "Payment Issue" screen with Retry and Cancel. A further family-plan paywall is accessible from the profile.

3. Offer on the paywall

7-day free trial, then ₹5,900/year, with ₹7,900 crossed out. Day-five reminder and "No Payment Due Now."

Premium messaging promotes unlimited sleep sounds, a sleep recorder, and additional features.

Later family offer: ₹5,900/year for three memberships. That screen also shows an individual plan at ₹2,999/year, different from the first offer.

4. What is available for free on the app?

Dashboard, profile, schedule setup, and demo reports are reachable after cancelling the purchase attempt. The flow reaches tracker instructions and a "Start Sleep Tracker" screen.

Reports shown are explicitly demo data. Completed free tracking, recording playback, and advanced report access are not established.

04 Sleep Cycle

Sleep Cycle AB | iOS app analysis | 3 October 2026

1. Onboarding

Welcome screen followed by health-data consent. Explains optional marketing attribution/tracking and asks how the user discovered the app.

Presents account creation/login options, sleep goals, and notification setup. Moves directly into a trial explanation.

2. When is it asking for money? Paywall

At the end of onboarding, after account-related screens, goal selection, and notification guidance, before any dashboard or sleep session is shown.

“Try 7 days free” opens Apple’s subscription sheet.

3. Offer on the paywall

7-day free trial, then ₹2,050/year, confirmed by Apple’s purchase sheet.

Full premium access during the trial, including recordings and additional programmes/tools. Day-five reminder, recurring billing disclosure, and cancellation messaging.

Restore purchase and redeem-code options.

4. What is available for free on the app?

Onboarding and initial preference setup. The paywall mentions a limited version after the trial ends.

No dashboard or free tracking session is included, so the recording does not establish the limited version’s exact features.

05 Remly

Sleep tracker | iOS app analysis | 3 October 2026

1. Onboarding

The captured flow starts with an app-tracking permission request, then reaches the home dashboard.

Tracker education appears when exploring sleep tracking, with “Continue” and “Not now.” Apple Health guidance also has a “Not now” option.

Account creation is offered inside the profile rather than blocking initial dashboard access.

2. When is it asking for money? Paywall

The captured paywall appears after dashboard exploration, at the end of the recording. PRO upgrade controls remain visible across the app.

The screenshots do not identify the exact tap that opened the final paywall.

3. Offer on the paywall

“Better Sleep in 7 Days” with a personalised plan summary.

7 days free, ₹0 due today, then ₹999 on the displayed billing date. Auto-renewal and cancellation messaging.

The billing interval for ₹999 is not shown, so it cannot be labelled monthly or yearly.

4. What is available for free on the app?

Home, sounds catalogue, sleep-help content, profile, and settings can be explored before subscribing. Sleep-goal, reminder, alarm, and integration settings are visible.

The tracker introduction is accessible. Actual tracking results, sound playback entitlement, and premium feature limits are not demonstrated.

06 Sleep Tracker: Sounds & Alarm

Leap Health | iOS app analysis | 3 October 2026

1. Onboarding

Starts with ratings and a personalised sleep questionnaire covering goals, recent sleep quality, sleeping difficulties, time to fall asleep, environment, conditions, habits, gender, and birth year.

Introduces Apple Watch and Apple Health. Collects bedtime and wake-up time, then requests microphone and notification access.

Ends with report personalisation and feature previews.

2. When is it asking for money? Paywall

After onboarding, before the dashboard. Shows a discounted annual/monthly choice, followed by a trial invitation before the main app is reached.

Another subscription screen is shown later during app exploration.

3. Offer on the paywall

Initial annual offer: ₹2,499/year, presented as ₹208.25/month with an 80% off label. Monthly option: ₹999/month.

Trial invitation: 7-day free trial; Apple's confirmation shows ₹3,999/year.

Later plan selector: ₹999/month, ₹1,999/quarter, or ₹3,999/year. The discounted annual offer and trial annual price are different.

4. What is available for free on the app?

Dashboard, sound catalogue, daily content, journal interface, and profile/settings are accessible. Ads are visible in the main app.

A tracking session actually starts; ending it produces a warning that sessions under ten minutes will not save sleep data.

Some content has premium labels, and the activity tracker has an "Unlock" control. Completed free reports and the exact free sound library are not demonstrated.

07 SleepWatch

Bodymatter | iOS app analysis | 3 October 2026

1. Onboarding

Asks about sleep goals and Apple Watch ownership. Offers account creation with a Skip option and collects personal information such as height.

Introduces notifications, consent, Apple Health access, and safety acknowledgements. Ends with a carousel promoting premium features.

2. When is it asking for money? Paywall

After permissions and safety consent, before the dashboard. The premium carousel includes a Skip option.

Another “Go Premium” screen is accessible later through the account area.

3. Offer on the paywall

Initial offer: 7-day free trial, then ₹3,599/year, confirmed by Apple’s purchase sheet.

Promotes sleep-sound capture, SleepWatch Score, snoring insights, unlimited white noise, habit insights, and smart bedtime reminders.

Later upgrade screen: ₹3,749/year or ₹569/month, with a 45% savings label on annual billing. The later annual price differs from the onboarding offer.

4. What is available for free on the app?

The account explicitly states “Your Account is Free.” Home, history, blog content, settings, and tracking setup are reachable.

Microphone setup and a sleep-recording Start screen are available. Several graphs contain demo data; completed recording and detailed free report entitlements are not established.

08 Sleep Monitor

Xi'an Monster Software Technology | iOS app analysis | 3 October 2026

1. Onboarding

Starts with ratings and social proof. Asks about goals, sleep duration, quality, continuity, snoring/breathing interruptions, early waking, daytime energy, gender, and age.

Generates a questionnaire-based "Sleep Wellness Score" and personalised action plan. Previews recordings, trends, soundtracks, and sleep insights before the paywall.

2. When is it asking for money? Paywall

After the personalised score and feature previews, before dashboard access.

Additional sales offers follow: a timed "one-time offer," a "Try Your Luck" promotion, and a "Super Prize" discount. The dashboard becomes accessible later in the flow.

3. Offer on the paywall

Initial annual plan: ₹1,499/year, presented as ₹124.91/month. Monthly plan: ₹1,499/month, confirmed by Apple's purchase sheet.

"One-time offer": 87% off, presented as ₹43.25/week; Apple's sheet shows ₹2,249/year.

"Super Prize": 50% off, ₹1,099/year, presented as ₹91.58/month. Uses countdowns and "Chosen by 89% Users" messaging.

No free trial is shown in these purchase sheets. "One-time offer" describes the promotion, not lifetime access.

4. What is available for free on the app?

Dashboard, sleep tips, sound catalogue, settings, and tracking setup are accessible after the offer sequence. Sleep factors can be selected; the flow reaches the active night-tracking screen.

Journal/report screens include sample-looking results alongside messages requiring at least 30 minutes of monitoring.

Full recording playback, completed reports, AI dream analysis, and programme access without payment are not established.
