

imote

Allow "Remote Control" to find devices on local networks?

iMote needs access to your Wi-Fi network to discover and sync with your TV.

Information from networks can be used to determine your location and create a profile of you.

Step 1

Make sure your TV is on

Every TV has a physical power button, usually located underneath the screen (center), or on the back side of the TV (left or right).

Next

Step 2

Confirm the pairing

To connect your TV you will need to confirm the pairing request. Depending on your model, you may need to:

Press "OK" on the pop-up that appears on your TV, or **enter the numeric code** shown on your TV screen.

Go to search!

2:06

Connect to your TV

Check that your phone and TV share the same Wi-Fi network.
